
MARYLAND

"More than 3,000 Marylanders served on both sides of the conflict at the Battle of Gettysburg. They could be found in all branches of the army from the rank of private to major general and on all parts of the battlefield. Brother against brother would be their legacy, particularly on the slopes of Culp's Hill."

—Inscription on the Maryland State Monument at Gettysburg

1st Infantry Battalion George Hume Steuart's Brigade, Edward Johnson's Division, Second Corps

This unit was organized from former members of the 1st Maryland Infantry which was formed at Winchester, VA, in the early summer of 1861 from a battalion of six companies organized at Harper's Ferry. The battalion became the 1st Maryland Infantry Regiment 16 June 1861 and two additional companies joined the regiment nine days later. The regiment was disbanded 17 August 1862 at Gordonsville, VA, at the conclusion of its twelve-month service and members of that unit, who did not join other organizations, formed the 1st Maryland Infantry Battalion at Winchester in September of that year. The unit was redesignated the 2nd Maryland Infantry in January 1864.

The battalion's black canine mascot, named "Grace," a stray that had been picked up by the unit on its way to Gettysburg, was killed during the early morning assault on Culp's Hill 3 July. According to firsthand accounts, the dog charged the Federal position on her own and pierced the Union line (the only Confederate to do so), barking with "valorous glee." Federal Brigadier General, Thomas Leiper Kane, mentioned that he last saw her on three legs between the Confederate and Federal lines apparently bewildered by the dead and wounded Southerners she found there. The loyal canine was soon "perfectly riddled" with bullets and mortally wounded but was able to lick the hand of a Federal soldier who tried to help her before succumbing to her wounds. General Kane ordered her to be buried on the field with honor, "as the only Christian minded being on either side."

Field and Staff
